PROFESSIONAL EXPERIENCE

Start.dev – *AI Generalist (Freelance Work)* **Sep 2026 – Present**

Run AI agents across product, community and GTM for an interactive coding education platform

- Produce marketing videos end to end with agents, author blogs with Sanity MCP, automate Discord workflows, and ship incremental product enhancements (vibe-coding)
- Doubled Start.dev's citations in AI-generated answers by running the reddit-led AI visibility play

Indium Software – *Senior Project Manager, LLM evaluations & AI Data Operations* **2024 – 2026**

Coordinated multilingual LLM evaluation for Uber AI Solutions, covering response quality, localization, and safety

- Developed annotation guidelines, QA protocols and red-team scenarios for human reviewers. Specific metrics and outcomes are withheld under NDA
- Prepared multilingual evaluation datasets and review rubrics for benchmarking model responses

Brane Enterprises – *Senior Product Manager, Solution Delivery* **2024**

SuperK – *Product Lead, Merchant Partner Software (B2B)* **2022 – 2023**

Led web & mobile products for franchise supermarket owners driving annual transaction volume of $6M+

- Designed and shipped 8+ modules for franchise partners across financials (invoice ledger, earnings reports), procurement (catalog, checkout, returns, new product requests), and inventory (stock visibility, audits)
- Built no-code, low-code tools for stock audits, access control, asset tracking, and order and returns monitoring
- Built a configurable rules engine for store-specific catalog, returns, and replenishment policies across 10,000+ products and 150+ franchise stores
- Improved monthly retention among newly onboarded merchants to 83.3%, with 75% overall customer satisfaction

Stanza Living – *Product Manager, Internal Tools for Supply Chain and Operations* **2021 – 2022**

Led product development for Stanza Sigma, a property project and task management platform driving operational and supply efficiency for Stanza Living

- Built scheduling and property management modules for Stanza Sigma, cutting project delivery time by seven days (25%) and contributing to projected annual savings of $2M
- Created product requirements documents (PRDs), feature workflows, process diagrams, and high-fidelity prototypes for desktop and mobile, working with business teams to translate site operations needs into product requirements
- Coordinated sprint planning and bug fixes with engineering, design, and other product teams, and created training videos to help site managers, operations, and support teams adopt Stanza Sigma

Diaspark Infotech – *Product Lead, Enterprise and Mobile Apps* **2016 – 2021**

Led product and growth for a portfolio of mobile apps in the news and vernacular media space

- Designed Bulletin's MVP and go-to-market plan, launching across 30+ districts and reaching 100,000+ installs and 75,000 monthly active users
- Launched Webdunia's progressive web app and mobile app in eight Indian languages, secured distribution on Google Play and Xiaomi's Mi Store, and reached 50M+ monthly page views
- Improved day-7 retention by 30% and cut bounce rate from 90% to 65% through UX copy tests, onboarding changes, and feature experiments
- In an earlier role in the Chairman's Office, built an internal social platform for Reliance, designing the employee content feed, achievement badges, and leaderboards to encourage employee participation
